

# Elevator Bucket Belts

Products:

*We have you covered from Head to Tail... Belting, Buckets, Pulley's, Fasteners, and Technical expertise.*

**STEP 1. Measure Your Elevator Bucket** Most manufacturers identify part sizes by molding dimensions into the bottom of the elevator bucket.

**LENGTH**

The bucket length is measured at the back mounting surface. Lay the bucket on its back for actual measurement dimensions.

**PROJECTION**

Projection is measured vertically to the lip, as it would project from the belt or chain.

**DEPTH**

Depth is measured for the overall side profile dimension.

**STEP 2. Select Your Bucket Style** There are two main categories of elevator buckets; agricultural and industrial.

**STEP 3. Choose Your Bucket Material** Buckets are available in the following materials: Polyethylene, Nylon, Urethane, FDA Nylon, plus ductile iron and steel for industrial applications.

Winged and lagged drum pulleys
