

# Belt Solutions for Bakery Production

Belt expertise for high-speed baking and forming operations.

- ✓ High-release belt materials
- ✓ Sanitary conveying solutions
- ✓ Reliable performance across bakery lines
- ✓ Foreign material contamination prevention

Production reliability for conveyor dependent operations.  
**Downtime is not an option.**

**24-Hour Service**

## Bakery production runs continuously.

Small conveyor issues quickly become production disruptions.

### Common challenges include:

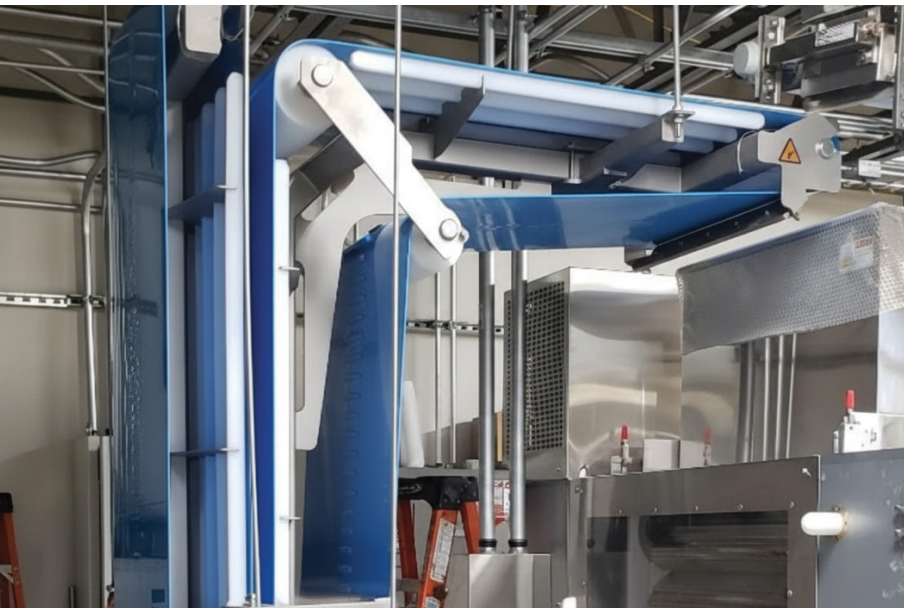

- Equipment downtime and ongoing conveyor maintenance
- Yield loss and product waste during forming, proofing, and transfer
- Skill gaps and labor shortages in the maintenance teams
- Foreign material contamination creating product and profit loss

These challenges reduce production efficiency, increase operational risk, and impact profitability.

## Belt Power helps bakery operations optimize line production.

Our teams work directly with maintenance managers, reliability engineers, and operations leaders to diagnose conveyor issues in real operating conditions and recommend solutions built for the application.

We are accountable for uptime and total cost of ownership. Our in-depth, technical product expertise, extensive local inventory backed by national scale, and 24/7 field support ensure solutions are selected and installed for the application. We extend service life and improve throughput across our customer's facilities.

## Production Applications

Belt Power supports conveying systems across key baking processes including:

- Dough chunkers
- Dough elevators
- Divider-rounders
- Spreader finger belts
- Rounders and sheeters
- Moulders and reciprocators
- Proofers
- Depanners
- Slicers
- Checkweighers and metal detectors

Production reliability for conveyor dependent operations.  
**Downtime is not an option.**

# Engineered Solutions for Bakery Operations

## High-Release Belt Materials

Support clean product release and consistent transfer across small pulleys and tight transitions.

## Oil- and Heat-Resistant Materials

Designed to perform in bakery environments with elevated temperatures and oil exposure.

## Bakery-Specific Belt Construction

Premium belt constructions designed for bun, bread, and pretzel production:

- Low-stretch materials
- Balanced constructions for forming and shaping
- Sanitary, high-release belt designs

## Additional Products supplied by Belt Power

- Guiderails
- Power transmission components
- Pulleys
- Industrial hose

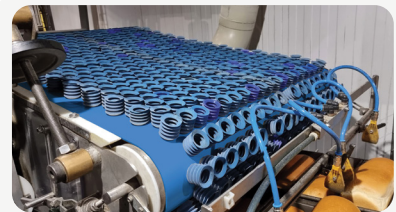

## Precision Fabrication & Installation

Reliable belt performance depends on accurate fabrication and installation.

### Belt Power provides:

- Consistent, accurate belt installation and splicing using advanced lacers, slitters, and belt welders
- Tooling and training for in-house maintenance teams
- 24/7 installation services when production support is required

## Industry-Specific Belt Features

- Belt cleaners
- Belt trackers
- Homogeneous positive drive belting
- Depanner belts with cups and retainers

Production reliability for conveyor dependent operations.  
**Downtime is not an option.**

# Why Bakery Operations Choose Belt Power

## Conveyor expertise with real-world support

Belt Power combines belt expertise, national scale, access to the industry's broadest range of suppliers, deep local inventory, and 24/7 field support to reduce failures and keep production on track.

## Comprehensive Product Support

Bakery operations can source from one partner for:

- Lightweight conveyor belts
- Blades
- Modular belting
- Homogenous belts
- Filter mesh
- Drum Motors
- Belt cleaners
- Timing Belts
- Industrial hose
- Power transmission components

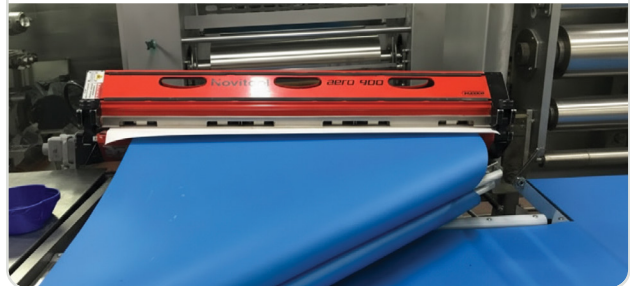

## Manufacturer Partners

- ✓ Intralox
- ✓ Habasit
- ✓ Ammeraal
- ✓ Chiorino
- ✓ Esbelt
- ✓ Wire Belt of America
- ✓ Flexco
- ✓ Worldwide Electric
- ✓ SEW Eurodrive
- ✓ Esband
- ✓ Megadyne

## Reduce Operational Costs

Belt Power helps reduce:

- ✓ Unplanned downtime
- ✓ Labor requirements
- ✓ Replacement frequency
- ✓ Installation time
- ✓ Product damage
- ✓ Energy use
- ✓ Inventory levels
- ✓ Product loss
